Supplies:

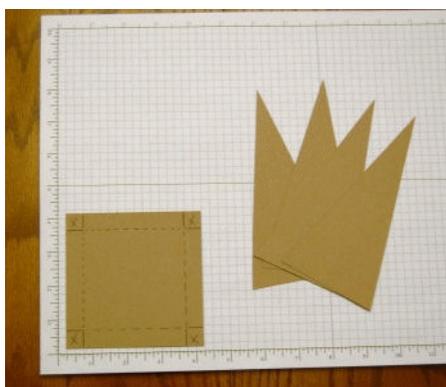

12" x 6" piece of Solid Cardstock
5 1/2" x 6 1/4" piece of Designer Series Paper
Sticky Strip
20" piece of taffeta ribbon
1/4" circle punch

Directions:

Step 1: Mark your solid cardstock at 3", 6" and 9" along one of the long ends. Mark the opposite long end at 1 1/2", 4 1/2", 7 1/2", and 10 1/2". Connect the dots to create four triangles. Cut these out with your personal trimmer.

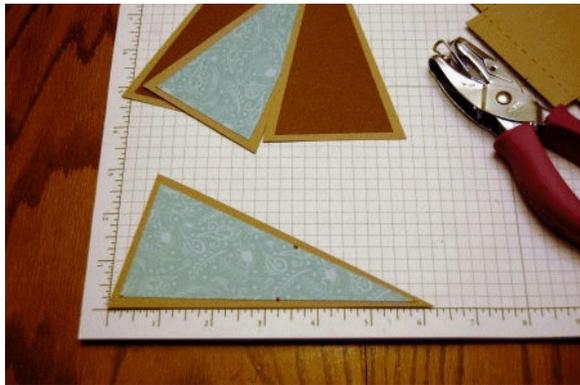

(Note: You can skip drawing the connecting lines and just connect the dots with your personal trimmer as you cut.)

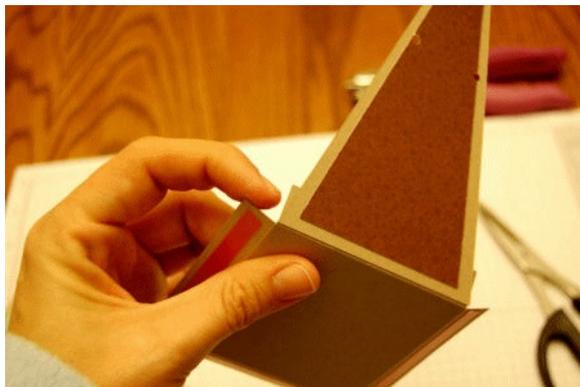

Step 2: Using your left over piece of Kraft cs cut out a 4"x4" square. Score this piece at 1/2" on all four sides and cut out the four corner squares so that you are left with a square bottom with flaps.

Steps 3: Mark your piece of DSP at 2 1/2" and 5". Flip to the opposite long end and mark at 2 1/2" and 5" again. Connect the dots and cut out the 4 triangles just as you did in Step 1. Adhere these pieces to your four solid card stock triangles.

Step 4: To ensure that the ribbon placement is uniform on your box, mark one of your triangles at 3 1/4" on each side. Punch holes for your ribbon using a 1/4" punch at each marking. Use this piece as a template for the other triangles.

Step 5: Attach the triangles to the flaps on your square bottom piece. As you adhere the triangles simply trim off the overhang of each flap so that it is no longer visible behind the triangle side.

Step 6: Thread your ribbon through the holes and pull closed. You are now ready to decorate for whatever occasion you want.
